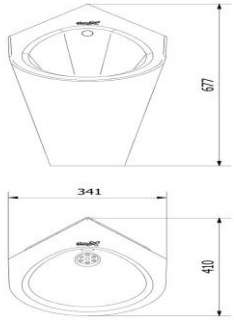
STAINLESS STEEL BATHROOM COMPLEMENTS. INDIVIDUAL URINAL. Ref. 03008

Description:

SUS 304 Stainless Steel

Finished satin

Water flush activation with tank or plumbing network flush with timer or tap.



Technical description:

Individual corner urinal made of SUS 304 stainless steel. The installation is done with support to the wall.
It connects vertically to the general installation of the water network.
It has in its interior of the pipes pick up debris and pipes for cleaning by discharge. The use of a fluxmeter or flush tank is required. The connection to the drainage network is made by a pipe allowing its connection to the wall. The installation of the urinal is fixed by screws to wall. The product has a satin surface finish that gives it adequate resistance against use. The product complies with EN-997.

Product description:

Collective urinal made of SUS 304 stainless steel
Wall mounted.
Compliance with the regulations EN-997
Exclusive use for fluxmeter or flush tank.

Product dimensions: 690 x 342x 527mm.
